PRINTER RESOLVE

Print scale and edge check

A4 / 210 x 297 mm / Portrait

Print one copy

Load the paper size named above. Select the same size in the print dialog.
For the first print, choose Actual size or 100% and turn off borderless expansion.

100 mm

Measure from the center of one end tick to the other.

Read the edges

Each edge has three marks. From the paper edge inward, the shortest is at 5 mm, the middle one at 10 mm and the longest at 15 mm in the PDF.
Circle any side that lost a mark, and record your measured line length below.

Top / Bottom / Left / Right

Measured: _____ mm Print setting: _____

Compare one change

For a second copy, change only scaling to Fit and compare the line and edges.
A shorter line means the page was reduced. Missing marks can also reflect paper size, alignment or the printable area of the device.
